

MODULE 1.3 XAMPP AND PHP

ELVIA GISELLA ADAIR
STUDENT

DAVID OSTROWSKI
PROFESSOR

AUGUST 16TH 2026

MODULE 1.3 XAMPP AND PHP

- Screenshot of Apache running in XAMPP

- Screenshot of the XAMPP dashboard

Welcome to XAMPP for Windows 8.2.12

You have successfully installed XAMPP on this system! Now you can start using Apache, MariaDB, PHP and other components. You can find more info in the [FAQs](#) section or check the [HOW-TO Guides](#) for getting started with PHP applications.

XAMPP is meant only for development purposes. It has certain configuration settings that make it easy to develop locally but that are insecure if you want to have your installation accessible to others.

Start the XAMPP Control Panel to check the server status.
